11 11

The diagram illustrates the construction of a 10x10 grid. It starts with a single row of 10 blocks. This row is then used to build a second row, and so on, until a full 10x10 grid is formed. The process is shown in five steps, with arrows indicating the progression from one stage to the next. In each step, a new row is added to the existing grid, and the blocks in the new row are shown being placed one by one.
