Circle management

Can the published dynamic content be edited/deleted?

Users can edit and delete the posts they published via the elink Circle Mini Program.

However, editing is not allowed in the following situations:

1. Posts published by other members in the elink Circle by the circle owner or administrators
2. The circle owner and administrators can edit, move to featured, pin, and delete the circle owner's posts published via the management console on the management console. However, for the circle owner's and administrators' posts published via the mobile app, they can only move them to featured, set them as circle announcements, and delete them, but cannot edit them.
