

How to enable information collection for image-text courses?

I. Function Description

The information collection function allows you to customize the collection of paid user information, including contact information like phone numbers and WeChat IDs, as well as personalized user information, to clearly depict user profiles.

So, how do you enable information collection for text and image courses?

II. Operation Steps

1. Create or edit a product and save it.

2. In the text and image list, click [...] - [Operation Settings], or click [Details/Edit].
