

Will users be notified after the major column is updated?

You will receive a message notification when the major column is updated. You can enable the service account notification function when updating the column course products under the major column.

At the same time, students need to actively subscribe to the update prompt before the service account notification will be sent to them.

****Note:**1. There will be no service account notification after updating the courses of a column that has been taken off the shelf or hidden.

2. You can continue to add single products after setting the column to stop updating. You can continue to update the column content. Students can receive message reminders only after manually changing the column status to [Start Update] for the column update

reminder.
