

Column Usage Tutorial

I. Feature Introduction

Columns support packaging and combining various types of courses (text - image, audio, video, live streaming) to form a systematic learning framework and content.

II. Purpose of Use

Provide a learning framework for students and create an immersive learning experience within the column.

III. Use Scenarios

Provide students with a combination of learning courses for a certain type of skill or topic.

Example: To cultivate the professional skills of sales staff, set up a sales - related column containing courses related to sales skills.

IV. Operation Path

Merchant side: Enterprise Training Management Console → Courses → Columns

Student side: H5 Academy → Classroom Homepage

V. Usage Tutorial

1.png

Step 1: Configure the Column *(Management Backend)*

Log in to the management console. Select [Columns] → [New Column] from [Courses].

2.png

(Management Backend - Courses - Columns)

2. Enter the new column page, fill in the column name, column introduction, column details, and upload the column cover.

(Management Backend - Courses - Columns - New Column)

3. Course Information

Course grouping: A function to classify and display courses.

4. Visible Scope: Set the courses to be visible to specified employees. Please read the [Usage Tutorial for Setting Visible Scope](#).

5. Listing Settings: Set the listing time of the courses. Please read the [Usage Tutorial for Listing and Delisting Settings](#).

6. Guide to Join the Community: Configure relevant communities and guide employees to join the community on the column details page. The steps are to enable the guide to join the community; set the guiding message; upload the community QR code.

7. Click [Save] to successfully create the column.

8. Select the corresponding column → [Content Management] → [Add Course].

4.png

(Management Backend - Courses - Columns - Content Management)

After adding courses, you can use the sorting function to adjust the order of courses within the column.

Note: A single - item course can be added to multiple columns.
