

Can the courseware be downloaded?

Currently, courseware cannot be directly downloaded by students.

If instructors need to allow students to download courseware, they can click on the material library in the PC live streaming room/H5 live streaming room to upload the courseware they want students to download in advance (currently, only word, ppt, excel, and pdf file types are supported for upload). After uploading, the corresponding courseware can be sent to the discussion area for students to download. Students can also find the file in the shared files for download.

Revision #2
