

Can the live stream continue after the scheduled time?

If the set end time for the video live stream has arrived, but the instructor has not exited the live streaming room, the instructor can continue the live stream as long as the live stream remains stable. There is no impact on the voice live stream, and the instructor can still send voice messages in the live streaming room.

Note: If the instructor's lecture time in the video live stream has exceeded the current end time of the live stream, to ensure that the instructor can continue smoothly, it is recommended to appropriately extend the live stream time before the scheduled end time to guarantee the smooth progress of the live stream.
