

How to display the newly created live stream on the homepage?

1. After creating a new live stream, select 'Publish'. Then, click to build the store homepage in [Store Management > Mobile > Store Homepage].
2. Click [Course Component > Live Stream] to add a live stream template. Select the corresponding live stream in [Live Stream Source > Manual Selection] on the right, and it will be displayed on the homepage.

* Note: [Default Rule] means that the first two latest live streams are displayed by default. Currently, live streams are sorted by live stream status and start time, in the order of [Ongoing Live Streams] - [Upcoming Live Streams] - [Ended Live Streams].

Revision #2
