

How to handle the issue of low audio volume in live streaming content?

This may be caused by the instructor being too far away from the microphone. When you need to conduct a live stream away from the device, it is recommended to use an external portable microphone device.

*Adding a pop filter or a sponge cover to the microphone will yield better results.

eLive Client

- Select “Settings”. After entering the settings page, select “Audio” and find the voice enhancement function. When the microphone volume is low or you are far from the microphone, it is recommended to turn on the voice enhancement.
- Select “Settings”. After entering the settings page, select “Audio” and find the option to increase the speaker or microphone volume.
