

If I exit my live streaming room before the scheduled end time, will the live stream end and become available for replay?

During the live stream, if the instructor exits the live room (not due to accidental manual termination of the live stream), the students will see a prompt indicating that the instructor has left the live room, but the live stream will not end. If the instructor is not in the live room when the scheduled end time of the live stream arrives, the live stream will automatically end.
