

Live streaming supports external graphic tablets

Function Introduction:

The live streaming client supports connecting to a graphics tablet, suitable for courseware annotation and drawing board scenarios.

Usage Conditions:

? The latest version of the eLive client or elink Assistant

? A graphics tablet

How to Connect an External Graphics Tablet:

? Connect the graphics tablet device to your computer

(When connecting a graphics tablet device to your computer for the first time, you need to install the driver. Just follow the prompts to install it.)

mtY4odg1mdq5mzg3ntyxng_11385_tzgp90smes8_o9sz_1677655829

? Enter the live streaming room (eLive client/elink Assistant)

All operations on the graphics tablet are treated as mouse operations.

Precautions:

? After the graphics tablet is successfully connected, the operations of the stylus are equivalent to those of the mouse.

Frequently Asked Questions:

1□ The writing area of the graphics tablet does not match the drawing board.

Answer: The graphics tablet is only used as a mouse. The drawing area is based on the drawing board area of elink Assistant.
