

What should I do if there is a harsh noise or the microphone howls during a live stream?

There are numerous reasons for squealing. Please check the following causes one by one: faulty microphone, excessive current, problematic motherboard sound card, or interference from nearby electronic devices.

You can refer to the solutions mentioned in this article.[Article link](#)

1. Try replacing the microphone to rule out device issues.
2. Keep the microphone away from external speakers and other audio - output devices to avoid interference.
