

How to change the QR code for a successful Joint Orderg?

There are two ways to change the QR code that pops up upon successful Joint Orderg:

1. If the course details page is set to prompt users to follow the Official Account after purchase, simply change the QR code image for prompting users to follow the Official Account after purchase.
2. If the course details page is not set as such, you can modify the QR code image in [Settings] - [Store Settings] - [Follow Settings] - [Prompt to Follow after Purchase].
