

How to set up the promotional poster for the online store?

Promotional store posters are mainly used by promoters to spread the store to customers.

elink will provide 3**default posters**. Merchants can also upload up to 3**customized posters** or go to the material center to use the **online production** image tool for online design.

You can hide the default posters on the management console and drag to adjust the display order of the posters. [image/png](#)

The following settings can be edited for customized posters:

- 1) Poster image
- 2) User avatar and nickname, nickname text color
- 3) Customize the positions of the avatar, nickname, and QR code
[image/png](#)

The effect is as follows:
