I. Function introduction

The elink Live Mini Program is a live - streaming efficiency tool. It supports one - click live streaming, allows students to watch live broadcasts, and enables the creation of live streams. It also has functions such as appointment reminders, providing users with a better live - streaming experience. (Merchants and students can use it directly without application and no technical service fees are charged for the time being.)

II. Purpose of use

Enable instructors to start live streams and students to watch live broadcasts in the Mini Program, lower the threshold for starting/watching live streams, and at the same time

enhance the live - streaming experience, helping merchants conduct live streams more conveniently.

III. Usage scenarios

Scenario 1:[Merchants start live streams quickly]After merchants with existing stores create a live stream, if instructors want to start the live stream on the mobile side, they can use the [elink Live Mini Program] to start the live stream with one click, saving the cumbersome process.

Scenario 2: [Students watch live broadcasts]Currently, when students watch live broadcasts, there are problems such as difficulty in finding the h5 entrance and difficulty in saving. By using the [elink Live Mini Program], students can view all the live broadcasts they need to participate in without worrying about not being able to find the live stream.

Scenario 3: [Individual users experience quickly]Merchants who do not have a store and want to purchase elink - related products can use the [elink Live Mini Program] to quickly create a live stream for experience.

IV. Operation paths

Path 1 (Created in the Online Store):

Store live stream:Create a live stream (on the PC management console) - Go to the live stream - Select [elink Live Mini Program] for the lecture - Start the live stream;

Students watch the live stream:Scan the QR code/Click the link/Search - Enter the [elink Live Mini Program] - Enter the live - streaming room - Watch the live stream;

Path 2 (Created in the Mini Program):

Create a personal live stream: Enter the [elink Live Mini Program] - Create a live stream - Start the live stream.
