Operation steps

Step 1: Start a stream-pushing live stream on Channels and obtain the streaming address and key

Operation steps: Log in to the Channels Assistant backend > Click “Live Stream Management” to create a stream-pushing live stream > Obtain the streaming address and key

image (1).png

image (2).png

Step 2: Edit the live stream in the elink backend and add the streaming address and key to enable rebroadcasting

Operation steps: Find the live stream that needs to be set > Click “Details” > Click “Rebroadcast Settings” > Enable “Rebroadcast to Third-Party Platforms” > Select the “Channels” rebroadcasting platform > Add the streaming address and key

image (6).png

Precautions

- a. You can only click “Start Live Stream” after there is an image in the “Live Stream Detection” area of the Channels Assistant backend.
- b. You need to start the live stream within 2 hours after creation; otherwise, it will become invalid.

Preconditions

Merchants need to complete the Channels verification

Rebroadcasting elink live streams to Channels is achieved through the stream-pushing live stream function of Channels, which requires merchants to complete the Channels verification. Currently, Channels officially supports multiple verification methods. For specific verification requirements, please refer to the official Channels website:

Operation steps: Channels > Creator Center > Apply for Verification > Select the verification method > Complete the verification according to the official Channels guidelines
