

What is the relationship between the Online Store homepage and the Mini Page?

The store homepage is essentially a Mini Page, except that this Mini Page is set as the store homepage.

How to set the homepage?

Click to enter [Homepage] - [Store Decoration] - [Mini Page] - [Page Management]. After saving the settings, you can click [Set as Homepage].

[Mini Page] can also be shared as a separate page. For example, you can configure the corresponding Mini Page for marketing themes. You can use the Mini Page for special displays during specific periods and on specific occasions.
